The tank wagon market in the Standard of Indiana territory is boosted from 1 to 2 cents per gallon. The fact that in all the years the independent refiners have boosted the price of crude, and one of the largest, namely the Sinclair Consolidated, was the first of the large concerns to advance the price of crude and an inquiry at the headquarters of the Sinclair people made in the last few days brought the response that "we put up the price and would not think of a decline at this time." Evidently the Sinclair people are not alarmed as regards a surplus.

The meeting of Oklahoma City called for today as a preliminary to the hearing before the corporation commission which is scheduled for Monday will doubtless bring many rumors about the situation in the oil field to a realization of just what they are up against in the way of freight rates in this state. The rates are of vast importance for the reason that there is so much crude oil shipped in tank cars to refiners in this state, and it will have an important bearing on the price of crude and the retention of the big premiums that have been paid by said refiners. Many states have refused to grant the 25 per cent increase in local freight rates, but the fact that can be expected in Oklahoma is that the 25 per cent be added to a rate ordered by the corporation commission during the war, but which has been ignored by railroads ever since.

Without going into the merit of the case, or claiming any special knowledge in regard to the trend of the crude market, it is hereby emphatically stated that one thing alone can be counted on to keep things going and that is—an advance in the tank wagon price. There are many producers who will not continue drilling as the following written by an expert will plainly show. It should be given careful consideration as it is the sentiment of many of the best of them among the producers:

Statement of W. H. Gray Relative to Market Condition of Crude Oil.

Some time ago the Petroleum Institute requested me to gather certain statistical data relative to the amount of crude oil gathered by the pipe lines in Texas, and I made request from the railroad commission for them to furnish me data from reports of the pipe lines to the commission. All pipe lines operating in Texas furnished monthly reports to the commission of the amount of oil gathered at each station. The summary of this data is here given:

Month	Production	Average
June	4,446,888.75	148,222.96
July	6,386,438.43	206,014.14
August	6,622,278.74	213,621.89
September	6,292,941.42	206,014.14
October	6,493,417.04	209,465.06
November	5,934,296.72	197,813.22
December	6,159,159.15	198,973.19
January	5,787,621.47	186,697.47
February	5,857,765.15	188,958.55
March	6,041,414.49	194,884.52
April	6,082,822.09	203,095.40
May	6,902,024.79	222,645.96

The producers of oil in the mid-continent field should survey these figures carefully, for the reason that while they may not reflect the entire amount of oil produced, they do reflect the entire amount being gathered by the big trunk lines and they show beyond question that the big trunk lines were delivering to refiners a vastly larger amount of oil in May of 1920 than they were delivering in June of 1919.

Much has been said by statisticians of a decline of the production of oil in the world and it has often been asserted that in a few years the supply will be exhausted. Nevertheless, the supply has gone on increasing each year notwithstanding these predictions. If the world wants the oil all the world has to do is to drill for it. This is what experience has shown and it has been again demonstrated this past spring which has continued to date. Do not believe the world need worry about its future oil supply. I do think it is time for the producer to begin to worry considerably about whether or not there is to be an over-production of oil and a decline in price, with the pipe lines getting all the oil they want and the independent refiners getting all they want and no one caring to store crude at \$3.50 a barrel. The crude market has shown a tendency of late to soften

GET OUR SHIPPING PRICE

We buy our lumber and crating material in carload lots and can give you a better figure on crating and shipping household goods.

We have a force of the best professional packers, who can get your goods out on short notice. We also operate the largest fleet of padded moving vans and oil field trucks in the state.

We have the largest fire-proof storage in the city and can store your goods cheaper because we pay no rent.

NICHOLS TRANSFER & STORAGE

rather than to get stronger. Every producer should cut his drilling down to the minimum, as the world now has plenty of oil and any substantial increase from the present production will result in a decline in market. If the producer will go slow with development the present market may obtain throughout the winter, and if the demand for gasoline is increased next year he may expect as good or better market than he has had this year.

The above figures taken in conjunction with the statistics the Oil Journal show beyond doubt that refiners no longer are drawing upon stocks of crude in order to take care of the demand for refined oil. This is the danger point for the producer of crude. It is to be hoped that the production will not be further increased and that consumption will be kept just a little in excess of production.

Waite Phillips Pool Holding Up Good

Waite Phillips' production in the well known Phillipsville pool, in township 14-11, holding up well, and so far there has been no water showing in any of the wells in that vicinity, despite rumors to the contrary.

That company No. 1 and No. 2 Henry Thompson, located in the north half of the southwest of 22-14-11, which came in at 4,500 barrels four months ago, are producing 2,500 barrels by actual gauge today. No. 1 and No. 2, Jancher sand, in the north half of the southeast of 22-14-11, produced 5,000 barrels daily production four months ago, are now making 2,800 barrels daily. These were the largest producers in that famous pool.

Grant County News.

The Green-Wyoming Oil company has made a location for a 3,000-foot test on an 8,000-acre block in Grant county. Location is on the Miller farm in the northeast corner of 26-28-4W.

The National Union Oil company is fishing for the underreaming lugs at 1,501 feet on its No. 1 Redmayne in the center of the northeast of the southwest of 33-25-3W.

The C. H. W. Oil company is building a rig for a test on the Sparks farm in the southeast corner of the southwest of 27-23-3W.

F. H. Griggs is rigging up for a test on the Long farm in the southwest corner of the southwest of 22-28-4W.

W. R. Page of the Texolean Oil company, accompanied by George H. Luther of Olean, N. Y., has been in Tulsa for several days looking after business interests, leaving last night for the East.

George H. Lowery and A. S. Werhbin of the Spencer Petroleum company are in the city on business. Mr. Werhbin has just arrived from New York and Mr. Lowery from their company's office at Arkansas City, Kansas. They report that their company is starting a 3,200 foot

Looking for an Extension of the Hewett Field

The Manhattan Oil company of Tulsa is starting a deep test in the northwest corner of the southeast of 18-28-2E, which is southeast of the Hewett field and in a likely looking bend of the Red river. It will be watched with great interest. Love county has always been an interesting proposition as there are so many seepages of oil down that way.

Late News From Bristow

The Skelly No. 1 Kitty Perryman in the southeast of 22-15-10 is making 300 barrels natural and No. 2 is making 240 barrels before being shot.

The Continental No. 2, Wallace Jack farm in 5-15-10, is making 270 barrels after a shot.

The Tidal, Stinson & Matthews No. 1 Dora Demors is drilling in at 2,721 feet. No. 2 of the same farm is drilling at 2,550 feet. Both are located in 33-15-10.

The Phillips Petroleum No. 4, Louis Miller in 33-15-10 is making 220 barrels after a shot.

The Kawfield Oil company, Stinson & Matthews, are drilling in their No. 4, located in the west half of the northeast of 2-15-10. No. 3 is drilling at 2,750 feet and No. 4 at 1,260 feet, while No. 3 is being given a shot.

Line Pipe and Casing for Immediate Delivery

NEW	USED
4 1/2 in. 20-lb. casing.	2 in. 1,000 foot line pipe.
1 1/2 in. 23-lb. casing.	2 in. standard line pipe.
1 1/2 in. 25-lb. casing.	4 in. standard line pipe.
1 1/2 in. 27-lb. casing.	4 in. 20-lb. casing.
8 in. 29-lb. line pipe.	5 1/2 in. 17-lb. casing.
	8 1/2 in. 23-lb. casing.
	12 1/2 in. 50-lb. casing.

Above sizes can be shipped immediately. Prices will be made upon inquiry subject to prior sale. We are also in the market to buy abandoned lines and old casing.

Meramac Well Stops Flowing

News that the now famous Meramac well, owned by the Carter-Oil company, the Parks Brothers and the Atlantic Petroleum company, in the southeast of the southeast of 5-20-6E has stopped flowing, started Tulsa oil men yesterday, until it was learned that this was caused by 470 feet of open hole that lies beneath the casing and that it is caving badly.

The 5 1/2 inch casing is being run today and it will be cleaned out Monday, after which the normal production will be resumed. The Cleveland sand, topped at 2,475 feet has only been touched, although it probably has drilled itself in a trifle. The well flowed 3,000 barrels Friday, putting 500 barrels into the flow tank in 6 hours, and the force of the oil bursting the flow line.

Many interesting stories are connected with this great well, one of them to the effect that the Carter-Oil company, owning the lease, donated a large portion to the Parks Brothers for drilling the well, which had to be completed within 16 days from spudding in. The drillers and toolers worked against time, and there was always a third man on the "day bench" to take turns at dressing the bit and seeing that there were no fishing jobs. Each workman received a bonus of between \$500 and \$1,000 when the gusher was brought in, and the Carter-Oil company paid the money with the 20 acres adjoining this big well to the south.

Grant County News.

The Green-Wyoming Oil company has made a location for a 3,000-foot test on an 8,000-acre block in Grant county. Location is on the Miller farm in the northeast corner of 26-28-4W.

The National Union Oil company is fishing for the underreaming lugs at 1,501 feet on its No. 1 Redmayne in the center of the northeast of the southwest of 33-25-3W.

The C. H. W. Oil company is building a rig for a test on the Sparks farm in the southeast corner of the southwest of 27-23-3W.

F. H. Griggs is rigging up for a test on the Long farm in the southwest corner of the southwest of 22-28-4W.

With the Oil Men

W. R. Page of the Texolean Oil company, accompanied by George H. Luther of Olean, N. Y., has been in Tulsa for several days looking after business interests, leaving last night for the East.

George H. Lowery and A. S. Werhbin of the Spencer Petroleum company are in the city on business. Mr. Werhbin has just arrived from New York and Mr. Lowery from their company's office at Arkansas City, Kansas. They report that their company is starting a 3,200 foot

test in the northeast of the east half of the northeast of 22-12-11E, in the Blackwell field effecting a very large producer, the income from which amounted to \$120,000 during a seven month period. In the northwest of the north half of the southwest of 22-29-1E it is drilling an offset test to a 41,000,000 gusher which came in at a depth of 912 feet, also the owner of a fine string of homes that are running at Saratoga this month, two of which came out in front Thursday. They are the "Crane" and "Knob", certainly a lucky day for Mr. Porter.

Miss Blanche Clark, of the accounting department of the Producers and Refiners corporation returned yesterday from her home at Sloom Springs, Ark., and is ready to take her duties again after a two month absence during which she has been suffering from throat trouble. Miss Clark has been connected with the P. & R. for two or three years, and is one of the most popular young ladies in the oil business.
